**10-16 November 2007: Supercomputing '07** - SC07 is expanding the frontiers of HPC by challenging the combination of computation, networking, storage, and analysis and hosting an exceptional technical program, an expanded exhibits area, an exciting education program and much more. Reno-Sparks Convention Center, Reno, Nevada, USA

---

**24-27 April 2007: Conference HealthGrid 2007 in Geneva** - HealthGrid 2007 is the fifth annual conference dedicated to grids for life science and healthcare. The goal of the conference is to give an opportunity to all stakeholders to review the status of the grid technology and to evaluate the progress made in the development and deployment of grid applications for life sciences, medical research and healthcare. Geneva, Switzerland

**24-27 April 2007: 1st Joint EchoGRID & EUChinaGRID International Conference** - Two international conferences will be organised in China to showcase results, exchange knowledge and learn about developments from emerging economies. Site-visits may be organised around the events in China, to have a first hand experience of the local technologies and developments. Balanced representation of industry and academic participants will be ensured. Beijing, China

**3-5 April 2007: 21st Annual HPCC Conference** - The National High Performance Computing and Communications Council holds an annual High Performance Computing and Communications Conference each Spring. This is one of the few conferences that emphasize communication between manufacturers and users, as well as academics and the government agencies which establish policy and regulate the use of advanced technologies. Each year the Council Conference Committee plans an agenda full of prominent speakers who provide a wealth of information in a forum designed for exchanging information, discussing technical issues, and transferring technology within the HPCC community. Hyatt Regency, Newport, Rhode Island, USA
